PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

If NO period for reply is specified above, the maximum statutory period will apply and will expire 6 MONTHS from the mailing date of this communication.

Office Action Summary	Application No. 10/811,736	Applicant(s) MIYATA ET AL.	
	Examiner Timothy D. Wilhelm	Art Unit 3616	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-23 is/are pending in the application.
4a) Of the above claim(s) 4 and 19-22 is/are withdrawn from consideration.
- 5) ☒ Claim(s) 12 is/are allowed.
- 6) ☒ Claim(s) 1-7,9-11,13-17 and 23 is/are rejected.
- 7) ☒ Claim(s) 8 and 18 is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. ____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

1. This Office Action is made in response to Amendments and Remarks submitted by Applicant 11/14/2006.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1,2,9-11 and 13-17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tajima (JP 2002137777) in view of Kumagai et al (6,536,800) and further in view of Igawa (6,679,522). Tajima discloses a motorcycle with an airbag apparatus 11, comprising forward, rear, and lateral walls, and handlebars. Tajima discloses the present invention except for an upper concavity formed in the rear wall by a connecting member and two lower concavities disposed in opposite lateral walls. Kumagai et al teach an airbag device comprising an airbag 11 and a connecting member, said connecting member 25 controlling inflation of a rear wall 11b of the airbag 11 and thus creating an upper concavity in said rear wall 11b. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the airbag of Tajima with the teaching of Kumagai et al's connecting member and upper concavity to increase the airbag's efficiency of absorbing energy.

Art Unit: 3616

4. Igawa further teaches an airbag 25 (Fig. 7(D)) having forward 12, rear, and lateral walls 13a,13b, and also comprising intermediate height concavities at 23 in the opposite lateral walls 13a,13b. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the airbag of Tajima and Kumagai et al with the teaching of Igawa's intermediate height concavities to raise the airbag's resistance to a load body once the motorcycle's driver hits the airbag.

5. Claims 2-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tajima, Kumagai et al, and Igawa as applied to claims 1,2, and 9-11 above, and further in view of Kassman et al. Tajima, Kumagai et al, and Igawa disclose the present invention except for the connecting member connecting the rear wall with the lateral walls. Kassman et al teach an air bag 28 comprising a connecting member 38 that connects a rear, passenger-facing wall with lateral walls of the air bag 28. With regard to claims 5-7, the combination of the teachings of Kassman et al with the airbag apparatus of Tajima, Kumagai et al, and Igawa results in a triangular shaped connecting member in which the connecting locations of the airbag are at the apexes of the triangle. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention to modify the airbag of Tajima, Kumagai et al, and Igawa with the teaching of Kassman et al's connecting member to better control the inflated profile of the airbag based upon occupant conditions.

Art Unit: 3616

Allowable Subject Matter

6. Claim 8 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
7. Claim 12 is allowed.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
9. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

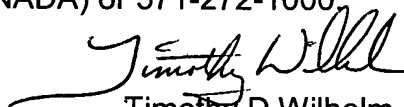

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Art Unit: 3616

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Timothy D. Wilhelm whose telephone number is 571-272-6980. The examiner can normally be reached on 9:00 AM to 5:30 PM Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Paul Dickson can be reached on 571-272-6669. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
